

## A LEVEL GEOGRAPHY: Induction work

Welcome to Phase 2 of the Geography work. Please see the Sway presentation, where all information is provided including relevant links.

To access this, simply click on the icon to the right.

### Your Phase 2 work:

The UK has one of the longest coastlines in Europe, stretching approximately 31,000km in length.

Some coastlines are eroding, others are growing due to the transfer of sediment around the coastline.

At A level, we will be studying Coastal landscapes including the factors that cause the landscapes, impacts of erosion, sea level rise and flooding, as well as the management.

#### **TASK 1: Coasts Glossary**

Put together a glossary of key terms related to coasts. Start with the terms in the list below, but you are welcome to add your own.

<b>Key word</b>	<b>Definition</b>
Abrasion/ Corrasion	
Attrition	
Berm	
Backwash	
Concordant coast	
Discordant coast	
Eustatic	
Hydraulic Action	
Isostatic	
Swash	

## TASK 2: Researching the Coastline

Choose an area of coastline in the UK- This can be any location of your choice, perhaps somewhere you have visited, somewhere you would like to visit, or even a place randomly chosen from the map.

Research and put together a case study page about this coastline. Again, this can be produced on the computer or by hand.

Aim to include in your Case study:

- Where is the coastline located?
- What is the Geology of the area?
- Some facts about the location
- Are there any special features there?
- Are there any reasons why this area is special/well known/famous?
- Can you also include some images/maps to supplement your writing?

## TASK 3: Microsoft forms summary

We are fully aware that not all of you will have studied Coasts at GCSE, however we want to assess your current knowledge of Coastal processes and landscapes.

Please complete the below Microsoft Forms Quiz which includes all multiple-choice questions.

If you have not studied Coasts at GCSE, please feel free to spend some time doing a little bit of further research prior to completing the quiz.

### How to submit your work?

- The Microsoft forms will automatically be sent to Miss Lowther when you click submit
- Please upload your report to the folder on Teams Assignments. You will need to upload the document e.g. word document, publisher or ppt document. If you have completed your work by hand, then you will need to take a photo of your work or scan it to the computer and upload it into the assignments folder.

**If you have any issues with uploading the Phase 2 work, please get in touch with;**
