

Biology
Induction
work:
Details

Hello and welcome to A level Biology!

Whether you consider yourself to be a budding David Attenborough, or want to be the next Florence Nightingale, A Level Biology will get you thinking and looking at our natural world in a far more in depth and fascinating light. To ensure that you are prepared for the breadth of content that we are going to study, the following Induction work has been carefully arranged to give you a taste of what is to come, to revisit some of what you already know, and for you to have the freedom to delve into an area of Biology that you have always found exciting.

I can't wait to see what you all produce, and for us to get started in September!

Phase 1: 24th May- 21st June

Task 1- Read through the accompanying course overview Powerpoint.

We also have a pdf copy of the Year 12 text book available through the school website (this is only accessible if you were at Hardenhuish in Year 11):

<https://hardenhuish.sharepoint.com/:b:/s/subjects/Sc/ERwygqssGj9EkOIWluPBOSgBg4oG2ey5aTjcC6TnGpD6qw?e=ClgYne>

If you are a student joining us from elsewhere and would like a copy to look at then please send me an email and I can send it to you.

RWK@hardenhuish.wilts.sch.uk

Phase 1: 24th May- 21st June

Task 2- Have a look at the accompanying reading list for A Level Biologists. Each has been selected and reviewed by a member of the Biology teaching team.

I would like you to choose and read ***at least one*** of these over the Summer, but I am leaving the choice up to you so that you can pick an area that you are particularly interested in. 'Context' forms a significant part of A Level Biology, so reading is one way to further yourself as a Biologist, and better prepare yourself for the course.

You will be asked to review your chosen book at **the end of induction phase 2.**

Phase 1: 24th May- 21st June

Task 3- You will be expected to have a strong knowledge of GCSE material before you start the A Level course.

I have created a class on [Seneca](#) – if you are unfamiliar with this it is a free online learning platform similar to SAM learning or GCSE Bitesize.

To access the class you can use the code:

1pykqklf3w

I will be setting some initial GCSE review questions in this first phase which I would like you to complete- your progress is automatically sent to me when you complete the tasks. **These have been specifically selected as areas that will be covered during Year 12.**

Phase 1: 24th May- 21st June

Task 4- Complete the Microsoft form at the following link, giving an insight into why you have chosen this course and what you are excited about, as well as which of the books you intend to read:
