

A-level Computing Summer Work – Development Diary

Please complete the following document after each hour of coding. If you choose to code for several hours in a row, please stop at the hour point and log your progress.

Remember that in some hours you will make more progress than others – it can sometimes take one hour to solve a single problem!

Date	Current task	What progress have you made during this hour of coding	What problems do you still need to overcome?	Screenshot of code for this hour
<i>e.g. 12/05/20</i>	<i>e.g. Task 1 – main menu</i>	<i>e.g. I added a while loop to my menu so if a user enters a number greater than 3 it will send them back to the top of the menu rather than crashing.</i>	<i>e.g. I still need to ensure the program can quit properly when I enter 3, as it still loops back around.</i>
